Check with your veterinarian as to type of vaccine

Do not get puppy around other animals or let people let the puppy lick them or their hands. Because puppies can get the parvo virus between the ages of 6 weeks to 16 weeks. So be as careful as you possibly can. Make sure puppy is eating. If not, put nutrical or hone on your finger and rub on roof of puppy's mouth. Call vet.

Feed Pro-Pac puppy mini chunks. Add sugar to water for about 1-2 weeks.
